DETAILED ACTION

Allowable Subject Matter

Claims 10-24 are allowed over the prior art.

The following is an examiner's statement of reasons for allowance:

In regards to allowable claim 10 prior art does not indicate a cylindrical sleeve section for passing the rotor shaft provided at an edge of an aperture in the stator, wherein the cylindrical sleeve section extends into the passing aperture and wherein the cylindrical sleeve section is formed from a material that has a lower hardness than that of the rotor shaft.

In regards to independent claim 14 prior art does not disclose a frame having a fixing surface to be affixed to the stator and a passing aperture for passing the rotor shaft and the passing aperture being disposed in a manner to overlap the aperture section of the coil bobbin for passing the rotary shaft and the coil bobbin has a cylindrical sleeve section that is inserted in the passing aperture of the metal frame and formed integrally with the coil bobbin by a resin member at an edge of the aperture section of the stator.

In regards to independent claim 18 prior art does not indicate a frame in which a structure defines a passing aperture that is configured for passage of the rotor shaft at a second end opposite the first end of the frame and the sleeve section is configured for insertion in the passage aperture of the frame so that the sleeve aperture lies inside the passing aperture of the frame.
